# From the scale to the office ... a NEW concept in data management!

## Why TransAct ...

From installation and setup, to everyday transactions, data management has never been easier! TRANSACT® was designed to make new scale management installations or upgrades virtually effortless. Even operators with little or no computer experience are immediately comfortable with its intuitive, graphically enhanced user interface.

But don't let its simplicity fool you—TransAct serves as a powerful central database, seamlessly integrating your entire operation with transaction information. From the scale, to the office, to the customer, all relevant data is quickly and accurately generated for each step in your enterprise.

## NEW! Version 5.0

- Two-scale operation
- Multiple transactions per ticket
- Networkable (Novell®, Windows® NT™/2000/Server 2003, Unix® and Linux®)
- Expandable reporting features
- Transaction importing/exporting, for long distance transfers in non-networking applications
- Credit and weight limits (TRANSACT Plus)
- Aging report showing current and extended balance 30, 60, 90 days (TRANSACT Plus)
- Job table for contract purposes (TRANSACT and TRANSACT Plus)
- Optional ATS-2 Automated Truck Scale System for unattended outdoor truck scales (TRANSACT and TRANSACT Plus)

## EASY!

- Requires little computer experience ... graphical interface shows you the way!
- Integrates with virtually any scale
- Windows XP Professional, XP Home and 2000 Professional
- Warnings and auto-saves prevent data loss
- Configurable for individual applications
- Custom ticket formatting, globally or by customer
- Sequential ticket numbering
- Weighs and prints gross, tare and net
- NTEP-certified Legal-For-Trade
- Supports magstripe, bar code and RF interface
- Cash and charge transactions
- Dynamically updates tare weights
- Multilevel password protection
- Quicksan utility to view, reprint and edit transactions

## The TRANSACT Advantage ...

Simple, yet powerful data manipulation maximizes efficiency in virtually any scale operation.

- Agriculture
- Bulk Construction
- Chemical
- Food and Beverage
- Forestry, Pulp and Paper
- Manufacturing
- Utilities and Waste
- Pharmaceuticals
- Supply Chain Management
- Transportation and Logistics

From the initial transaction ...

to data collection ...

Automatically tracks customer transaction data by weight, account, product and total charge.

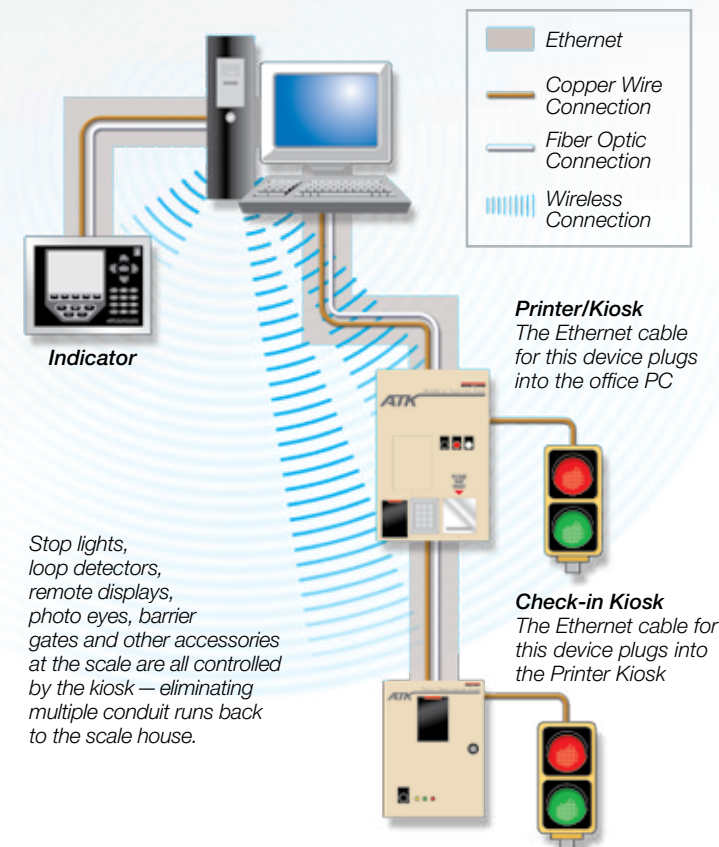

to report generation and more!

To complete the information cycle, TransAct conveniently provides tickets, reports and more. From general summaries for your accountants, to detailed documentation for customers and regulatory agencies, TransAct quickly and accurately generates the required information.

## Enhance Your Enterprise With Our Automated Ticketing Kiosks

Rice Lake's powerful Automated Ticketing Kiosk system increases efficiencies and optimizes the flow of trucks in and out of your plant. This unique solution virtually eliminates transaction errors by automating everything from the point of sale, to the invoice, to account management. With an easy to use interface, these kiosks integrate seamlessly with any size facility's central office and accounting systems. Featuring a rugged NEMA 4 outdoor enclosure for long-lasting durability, this unique solution supports automatic identification of trucks and fully automated ticketing.
